To Whom It May Concern:

Ward Scott Architecture has worked with the Demopolis City Board of Education over the course of the last two years. They have addressed pressing needs with multiple projects at two school campuses. Recently, they responded within days to address a project requiring an emergency declaration and provided immediate attention allowing for State approval in short order. Through this process, we successfully engaged contractors to perform noisy work during a narrow window that students were out of school. This expedient response permitted teachers and students to continue with the learning process with minimal distractions.

Through our partnership, Ward Scott has always been available to help us with projects of any size and type including planning and presentation concepts. No matter the size or budget of the project, the staff at Ward Scott Architecture treats our school system like we are their only client. We value our partnership with Ward Scott and look forward to maintaining a continued working relationship with future endeavors.

Please do not hesitate to contact me if you have any questions.
