To Whom It May Concern:

Over the course of the last two years, Ward Scott Architecture has worked with the Bibb County Board of Education on a variety of projects ranging from very small self-performed work to current initial planning of a significant capital improvement plan within our system. We have always depended on them to provide on-time and in-budget projects.

These knowledgeable individuals have been standing ready to help with any project, regardless of size and scope. We look forward to a continued working relationship with this firm.

Please do not hesitate to contact me if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Duane McGee".
